

Read the corresponding technical documentation for handling and safety reasons.

KNAUER plastic sample tubes

The KNAUER plastic sample tubes are specially selected for usage with our freezing point osmometers. Due to the sensitivity of the measurement method, the quality of the sample tubes is crucial to obtain reliable results.

The delivered sample tubes are specially tested by KNAUER and we recommend to use only these tubes for osmolality measurements.

KNAUER does not assure reliable results when plastic sample tubes are used which were not purchased via KNAUER.
